Please read the appropriate patient brochure entitled *Important Information for Augmentation Patients about Mentor MemoryGel™ Silicone Gel-Filled Breast Implants* or *Important Information for Reconstruction Patients about Mentor MemoryGel™ Silicone Gel-Filled Breast Implants*. These educational brochures provide you with information about the risks and benefits of silicone breast implants. It is very important that you take the time to read and fully understand the brochure; ask any questions you may have; and then wait at least one to two weeks prior to scheduling surgery with MemoryGel™ silicone gel breast implants. After reading and signing the Acknowledgement of Informed Decision Form in your brochure, and after the consultation, your surgeon will help you decide which implant is the right choice for you.

Designed to suit

Now that you have read the patient brochures on saline and **MemoryGel™** breast implants, you may have additional questions on product features.

Mentor offers a number of specialized products that are tailored to the personal and unique needs of women. In addition to the choice of saline or **MemoryGel™** breast

Saline

- FDA Approved
- Filled with a saltwater solution similar to the fluid that makes up most of the human body; slightly firmer feel
- Flexible fill volume, allowing the surgeon to adjust the volume during the procedure
- Three projection options: Moderate, Moderate Plus, High Profile
- Two shell surfaces available: smooth and textured
- Smaller incision size with various options for incision placement
- Covered by Mentor's standard or enhanced limited warranty and lifetime replacement policy

a woman's body.

implants, Mentor provides a wide variety of size, profile and surface texture choices, offering surgeons more options to achieve the best fit for their patients' body types.

Here is a closer look at some of the features of both saline and **MemoryGel™** breast implants.

MemoryGel™ BREAST IMPLANTS

- FDA Approved
- Filled with Mentor's proprietary cohesive gel formulation that holds together uniformly while retaining the natural give that resembles breast tissue
- Set fill volume
- Three projection options: Moderate, Moderate Plus, High Profile
- Two shell surfaces available: smooth and textured
- Slightly larger incision size with various options for incision placement
- Covered by Mentor's standard or enhanced limited warranty and lifetime replacement policy
